### Garage Door Sales and Installation in Saskatoon.

Buy a new garage door and get it installed by Saskatoon's best-rated garage door company!

## GARAGE DOOR SPRINGS REPLACEMENT SERVICE

There are three most common garage door spring types that most garage door manufacturers use. **Torsion springs**, extension springs, and a Torquemaster spring system. Torsion springs are by far the most common springs here in Canada and most likely worldwide. Most standard residential torsion springs are rated for about 10-12 thousand cycles and will last on average 7 – 10 years, providing you with the smooth operation of your garage door.

When balanced properly, your garage door should be very light, and most homeowners can lift their double garage door with one hand only when disengaged from the opener. However, when one of your torsion springs break (and usually you have more than one on a double-sized garage door), you'll get stuck inside, as your opener won't be able to raise the door with only one operational spring.

That's why Saskatoon Garage Door Fix provides same-day garage door springs replacement service in Saskatoon and surrounding areas. Our team understands the importance of same-day emergency garage door service, as finding yourself stuck at home when you're getting late for work or a doctor's appointment is always extremely stressful.

## GARAGE DOOR OPENER INSTALLATION SERVICES

**Garage door openers** became an essential part of our lives. None of us would get back to those days when you had to get out of your vehicle and open your garage door manually, especially during the freezing winter months we have here in Saskatoon.

Unfortunately, as with all electronics, garage door openers often break, leaving you with few choices. Either replacing the whole unit or trying to repair your existing garage door opener.

In most instances, repairing an opener doesn't make too much sense, as replacement parts and time spent on the repair can cost as much as a whole new unit. For that reason, we decided to offer a garage door opener replacement service instead of repairs. (Of course, minor repairs still can be done if necessary.)

Our garage door repair professionals will troubleshoot your operator issue and provide you with the best and most cost-effective solution. We only work with Liftmaster garage door openers, as we find them to be the most reliable operators on the market. **Liftmaster** openers have a huge model lineup to choose from. Budget-friendly models that offer basic functionality, or more expensive models with built-in security cameras and packed with various safety features.

## GARAGE DOOR CABLES REPLACEMENT

In general, garage door cables can last decades without the need for replacement. However, the local climate can affect your torsion cables and bottom brackets, causing them to get rusted and snap.

Rusted garage door cables can be dangerous as they can snap at any moment, causing your garage door to go off tracks or get stuck within the tracks. Please be extremely careful if, at any point, you notice that your garage door gets out of alignment. You should stop using your garage door immediately and call your local professionals to get it fixed ASAP.

## SERVING SASKATOON WITH PRIDE

As a local company, we're deeply committed to serving the Saskatoon community. Our dedication to excellence and customer satisfaction has made us a trusted name for garage door services in the area. When you choose Saskatoon Garage Door Fix, you're not just getting a service provider, you're getting a partner who cares about the safety and functionality of your garage door.
